

PHD 2025 Batch 2 Total Marks: 5 AIML

Deadline for submission is 22.06.2026

Sr No	Question	Marks
1	Explain the working of a Decision Tree. How does Information Gain help in feature selection?	1
2	Differentiate between classification and regression. Give two algorithms used for each.	1
3	What is cross-validation? Explain k-fold cross-validation and its advantages over a simple train-test split.	1
4	Define precision, recall, and F1-score. When would you prefer F1-score over accuracy as an evaluation metric?	1
5	Explain the working of the K-Nearest Neighbours (KNN) algorithm. What are the effects of choosing a very small or very large value of K?	1
